

A Protocol For Decentralized Opinion Markets, Using Wisdom Of The Crowd And Rewarded Human Knowledge, To Foster Better Decision Making.

WHY FINNOQ?

Today, opinion markets are controlled by resource-powerful actors spreading biased and incomplete information to society. Therefore, Finnoq creates a future for collective opinion statements, allowing better decisions for all.

WHAT IS THE FINNOQ PROTOCOL?

The Finnoq protocol produces a better basis for decisions, leveraging the wisdom of the crowd combined with truth-telling incentives. Honesty and knowledge of each participant are rewarded. The protocol is an open source digital infrastructure to which all developers have access.

Three layers exist in the Finnoq protocol. First, the Finnoq Core Layer facilitates collecting of human knowledge, distributing rewards, and tracking participant credibility over time. Second, the Service Layer provides the bridge between the Finnoq Core Layer and its end applications, host to standardized APIs and all algorithmic possibilities (e.g. modules and templates) proven to execute end applications. From there, developers can create their own opinion market at the Application Layer, choosing modules and templates to integrate them with standardized APIs from the service layer and begin opinion formation processes.

USE CASES

- Collective Ratings
- Financial Advice and Evaluation
- Industry-Specific Market Surveys
- Idea Generation for Product Development
- more...

FNQ TOKEN MODEL

EXECUTION

The FNQ Token authorizes participants to be part in the "opinion formation process". In order to obtain rewards, FNQ must be stored in a stake contract.

VALUE TRANSFER

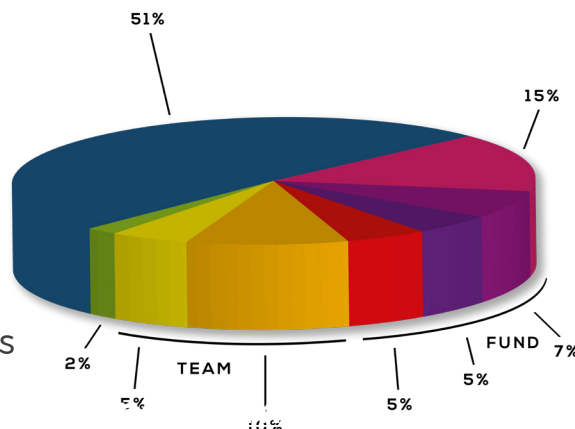

The FNQ Token is the fuel of the Finnoq protocol. All transfers of value within the ecosystem are made in FNQ.

GOVERNANCE

All FNQ stakeholders decide in which direction the Finnoq protocol steers.

FNQ TOKEN DISTRIBUTION

- TOKEN SALE
- ECOSYSTEM FUND
- PARTNERSHIP FUND
- RESERVE FUND
- FUTURE TEAM FUND
- TEAM
- ADVISOR & LONG-TERM MENTORS
- BOUNTY

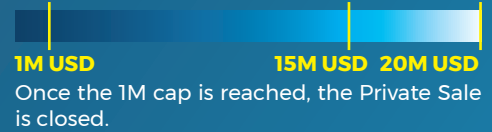

TOKEN SALE

Private Sale	0 - 1 Mio	(100% Bonus)
Pre-Sale	1 - 15 Mio	(30% Bonus)
Crowd Sale	15 - 20 Mio	

TARGET

Accepting ETH, BTC

FOUNDING TEAM

Above all, the founding team is characterized by the combination of many years experience in the field of blockchain and economic know-how. Both are passionate entrepreneurs.

Florian Kögl, CEO
